## Projects

### E Commerce Application ( Java, Servlet, Jsp )

Developed an e-commerce application using Java Servlet and JSP involves designing a dynamic web application where users can able to add, update, remove their products.

### Event Management Application ( Java, Servlet, Jsp, server, Mysql )

Developed an event management CRUD application designed using Java Servlets, JSP, and MySQL. This application allows users to create, read, update, and delete event records. The application is intended for use by event organizers to efficiently manage event details, attendees, and schedules.

### Interactive Web Applications ( Html, Css, Javascript, Bootstrap )

Designed and build several small applications using HTML,CSS, JavaScript and Bootstrap such as to-do lists, calculator, length and temprature converter, login pages and interactive forms.

### Portfolio website ( react.js, Bootstrap )

Creating my dynamic responsive portfolio website using react.js and bootstrap.
